- 2/25 UHV Claud Jacobs Tournament - Tee Times Available After Play

# SUPERINTENDENT'S CORNER

---

January was an exciting month at Colony Creek! We had plenty of precipitation (in multiple forms!) that we had been missing out on during the end of last year. The more precipitation we can get deep into our soil and into our ponds, the better we will be set up as we get back into our growing season. We were a little bit unlucky with a couple of small irrigation breaks, but we were able to get those fixed quickly. We would like to thank our LGA group for donating a new shipment of bunker rakes to help replenish our broken rakes on the course and add them to bunkers where we could use more! Our plan is to get multiple rakes on the majority of our bunkers on the course. With more rakes out there, we can have easier access to rakes for golfers inside the bunkers and make it more convenient to rake after playing. The course took on a different color after the snow day, brown! The weather was so cold that it caused our warm season grasses to go into dormancy. Dormancy is the turf's response to help it survive harsh temperatures. In layman's terms, the grass is taking a nap until temperatures warm up. The grass is still alive, but it does stop growing during this time. This helps the grass conserve energy and nutrients for when the growing season returns. Dormancy does not occur every year in our area, it takes some serious cold conditions to get dormancy started. It has been a great first month to 2025, and we are excited for what the rest of the year will bring us!
