# SUPERINTENDENT'S CORNER

---

July was a very busy month on the course! Our summer greens aerification went exceptionally well early in July. The recovery was even quicker than expected. With help from Mother Nature, we had some great grass growing weather due to the rains we were still receiving and the temps staying in a nice range. Our scheduled spiking has been going well, and I believe we have seen some great results on the fairways and tees filling out our grass. Mother Nature was kind to us to start summer and early July, but the weather took a hard turn late this past month. Our irrigation system has been put to the test and that is what my team and I have been spending a fair amount of time repairing and maintaining the past couple of weeks. I must also apologize for the state of the rough. I have heard and seen the issues with lost balls on well hit shots. The wet start to summer has our rough grass thriving and growing much faster than normal. That coupled with a breakdown on one of the decks of our tractor pulled mower has put us behind where we need to be. We were able to get the mower back up and running at 100% and will be able to catch up on our mowing and stay caught up, so that we do not return to those conditions. It's hard to believe summer 2025 is almost over. We begin easing our way into the tournament season with some of our usual events, and finishing the month off with the always exciting Club Championship. Our team is working hard through the dog days of summer and will strive to finish strong.
