# SUPERINTENDENT'S CORNER

---

It feels as though Spring has sprung and we are now well on our way to full blown Summertime! Work on and around the course has been nonstop despite record breaking rainfall all throughout the month of May. With all the rain comes rapid grass growth which we are very thankful, but on the downside, the extra moisture and grass growth brings in the not so welcome state bird of Texas aka...the MOSQUITO! Fogging for mosquitos will begin ASAP and will continue throughout the Summer as needed. Work on the greens has gone extremely well, and we will continue with a dry herbicide application scheduled that will help with the goose grass and crab grass growth that can be seen around the greens. Work on the fairways has begun with the crews slashing this past week. Over the next few weeks slashing of the fairways will continue along with the application of fertilizer and pre-emergent. Work on eliminating the carpet grass around the tee boxes and fairways is also set to begin this month. Irrigation is always a top priority, and as we move into Summer and the sweltering hot and dry months, attention will be turned toward tackling the numerous irrigation leaks around the course. Work to restore the irrigation on the driving range will also slowly start to take place. We will continue to enforce a schedule on the driving range with the hopes that a normal rotating schedule will help return the grass hitting area to a good condition again. We do appreciate the cooperation of our members in following this schedule.

“Life is not fair, so why should I make a course that is fair” – Pete Dye
